

When preparing for the treatment of **Pantry Pests** by Gaths Pest Patrol, be sure to abide by the instructions below **BEFORE** arrival of technician

- Remove and discard all infested material and food (including in and under sinks and cabinets).
- Go through and discard all food packaging (especially cardboard food packages sealed with glue).
- Remove **all** food from top of fridge, countertops and cabinets.
- Empty **all** kitchen cabinets and drawers.
- Seal all food after opening (including pet food). Place food in tightly sealed containers or store in the refrigerator.
- Clean all kitchen and pantry surfaces, shelving and cabinets from food crumbs and debris.
- Remove all shelf paper and wash cupboards with hot soapy water.
- Keep garbage in closed containers and take garbage out every night.
- Remove all clutter and debris (i.e newspapers, boxes, bags, clothing, books, etc.).
- Fish tanks need to be unplugged and covered.

- All people and pets must be **out for 2 hours after treatment**. Children under the age of two must be **out for 4 hours**. People with respiratory problems, heart conditions, pregnancy or poor health should vacate the premises for up to 6 hours, as a precaution always check with your health care physician if you are unsure.

**AFTER SERVICE:**

- If you see dead insects inside your cabinets, or on the floor, please use a dry cloth to clean them up. **Do not use a wet cloth** because it will dampen the effectiveness of the product used and hinder successful results.
- At this point your items are safe to return to the cabinetry and counters.
- After treatment is completely dry, you may return the cleaned non infested sealed food products back into the cabinets.
